

MOHAMED MOHAMUD SH HASSAN

Plant Pathology Specialist | Seed Inspector | Agricultural Professional

Phone: +252 612 330 512 | Email: maameyare07@gmail.com | Blog: pathosolutions.blogspot.com | Location: Somalia

PROFESSIONAL PROFILE

A dedicated agricultural scientist specializing in plant pathology, seed inspection, and sustainable agricultural systems. Currently serving as a Seed Inspector at Somali Agricultural Regulatory and Inspection Services (SARIS), contributing to seed quality assurance, regulatory compliance, and agricultural standards development. Also Founder & CEO of PathoSolutions, an agricultural innovation platform focused on plant disease management, knowledge dissemination, and collaborative research. Former Lecturer in the Department of Agriculture at Afgoye International University, with hands-on experience in agricultural education, research supervision, and farmer capacity building. Committed to advancing sustainable agriculture, food security, and climate-resilient farming systems in Somalia and beyond.

PROFESSIONAL EXPERIENCE

Seed Inspector

Somali Agricultural Regulatory and Inspection Services (SARIS) — Somalia

September 2025 – Present

- Certified seed varieties for national distribution ensuring compliance with international phytosanitary standards
- Performed field and laboratory quality assessments for seed integrity and viability
- Ensured regulatory compliance with national and international agricultural standards
- Provided strategic advisory to the Ministry of Agriculture on seed policy and quality frameworks

Founder & CEO

PathoSolutions — Somalia

2024 – Present

- Scaled agricultural innovation platform serving 500+ farmers with plant disease management solutions
- Developed and managed an agricultural blog and knowledge platform for practitioners and researchers
- Cultivated strategic partnerships with international organizations and research institutions
- Promoted evidence-based plant disease management and sustainable crop protection practices

Lecturer & Research Supervisor

Afgoye International University, Department of Agriculture — Somalia

April 2025 – September 2025

- Mentored students in plant pathology, crop protection, and sustainable agriculture
- Supervised student research projects in sustainable agriculture and pest management
- Modernized curriculum to align with global agricultural standards and evidence-based practices
- Introduced modern teaching methodologies and practical field-based learning approaches

EDUCATION

Master of Science (Agri.) in Plant Pathology

Lovely Professional University (LPU), Punjab, India — 2024

- Thesis: Management of Curvularia Leaf Spot of Maize Using Bio-Control Agents and Fungicides
- Specializations: Integrated Pest Management, Bio-control agents, Fungicides, Agricultural research
- Impact: Advanced sustainable crop protection strategies, reducing chemical dependency through biological alternatives

Bachelor of Science in Agriculture

International University of Business Agriculture and Technology (IUBAT), Dhaka, Bangladesh — 2021

- Thesis: Identification of Rice Genotypes for Flash Flood Submergence Tolerance
- Specializations: Sustainable agriculture, Research techniques, Pest and disease management
- Impact: Strengthened food security research on staple crops, identifying flood-tolerant rice genotypes vital for safeguarding production against extreme weather events

TECHNICAL SKILLS & EXPERTISE

Core Competencies: Integrated Pest Management (IPM), Seed Quality Control & Certification, Plant Disease Diagnosis, Agricultural Research Methods, Data Analysis (R, SPSS), Climate-Smart Agriculture, Crop Protection, Sustainable Farming Practices, Farmer Training & Capacity Building, Phytosanitary Standards Compliance

Research Focus: Bio-control agents, Fungicide management, Maize pathology, Rice submergence tolerance, Flash flood resilience, Seed system development, Agricultural policy advisory

Languages: Somali (Native), English (Fluent)

RESEARCH & PROJECTS

Maize Disease Management Research

- Comprehensive research on the management of Curvularia leaf spot of maize using bio-control agents and fungicides
- Contributed to sustainable crop protection and reduced chemical dependency in smallholder farming systems
- Tags: Bio-control, Maize, Plant Pathology

Agricultural Training & Farmer Support

- Designed and delivered hands-on training programs for farming communities in Somalia
- Focused on pest identification, seed selection, and climate-resilient agricultural practices
- Reached 1,000+ farmers through workshops, field demonstrations, and knowledge transfer programs
- Tags: Capacity Building, Farmer Training, Food Security

PROFESSIONAL MEMBERSHIPS

- **FAO e-Agriculture Community Member** — Food and Agriculture Organization of the United Nations (FAO)
Recognized member contributing to knowledge exchange in plant pathology, crop protection, sustainable agriculture, climate adaptation, and agricultural research.

SERVICES & CONSULTING

- **Plant Disease Diagnosis** — Accurate identification and management of crop diseases using evidence-based diagnostic methods
- **Seed Inspection & Certification** — Comprehensive seed quality assurance aligned with national and international standards
- **Agricultural Consulting** — Strategic advisory on crop protection, pest management, and sustainable farming practices
- **Farmer Training & Capacity Building** — Hands-on workshops and knowledge transfer programs for farming communities

PUBLICATIONS & KNOWLEDGE SHARING

- Active contributor to **PathoSolutions Blog** (pathosolutions.blogspot.com) covering plant pathology, pest management, seed quality, and agricultural innovation for researchers, students, and practitioners.
- 1+ research publication in plant pathology and crop protection.

MISSION & VISION

Mission: To strengthen sustainable agricultural systems through scientific research, plant disease management, seed quality assurance, and climate-smart agricultural practices that improve food security, farmer resilience, and crop productivity.

Vision: To become a leading agricultural scientist and plant pathology expert contributing to global agricultural

resilience, sustainable food systems, and advanced plant health solutions through innovation, education, and scientific collaboration.
