Career Objective

Agricultural specialist and Plant Pathology expert with a Master of Science in Plant Pathology and professional experience in seed inspection, agricultural regulation, academic lecturing, and plant disease management. Strong expertise in Integrated Pest Management (IPM), bio-control strategies, fungicide applications, and sustainable agriculture systems. Currently working in national seed quality assurance and regulatory inspection under SARIS, contributing to seed certification systems and agricultural input quality control. Experienced in academic teaching, field research, data analysis, curriculum development, and climate-smart agriculture practices aimed at improving food security and agricultural resilience.

Current Position

Seed Inspector

Somali Agricultural Regulatory and Inspection Services (SARIS), Somalia

2025 – Present

- Conduct inspection and certification of agricultural seed production systems in accordance with national seed laws and quality standards.
- Evaluate seed quality including purity, germination rate, and phytosanitary conditions.
- Monitor seed production, processing, storage, and distribution systems.
- Enforce national seed certification standards and agricultural quality assurance policies.
- Collaborate with farmers, seed producers, and agricultural stakeholders to strengthen seed systems.
- Contribute to national food security through improved seed quality control and certification.

Lecturer, Department of Agriculture

Afgoye International University, Afgoye, Somalia

April 2025 – September 2025

- Delivered lectures in **Plant Pathology** at undergraduate level.
- Prepared teaching materials focused on plant disease diagnosis and management.
- Supervised student academic discussions and guided learning in plant pathology concepts.
- Supported departmental academic activities and student engagement.

Education

Master of Science (Agri.) in Plant Pathology

Lovely Professional University (LPU), Punjab, India

2024

Thesis: *Management of Curvularia Leaf Spot of Maize Using Bio-Control Agents and Fungicides*

Key Skills: Integrated pest management, bio-agents, fungicides, agricultural research, capacity building

Bachelor of Science in Agriculture

International University of Business Agriculture and Technology (IUBAT), Dhaka, Bangladesh

2021

Thesis: *Identification of Rice Genotypes for Flash Flood Submergence Tolerance*

Key Skills: Sustainable agriculture, research techniques, pest and disease management

Professional Experience

Founder & Agricultural Knowledge Platform Lead

PathoSolutions | PathoSolutions Website

2023 – Present

- Established an agricultural knowledge-sharing platform focused on plant disease management.
- Developed educational resources on Integrated Pest Management and sustainable agriculture.
- Engaged farming communities with practical solutions for crop protection and productivity. Promoted research-based agricultural awareness and capacity building.

Thesis Research

Lovely Professional University

2023 – 2024

- Conducted experimental research on maize disease control using bio-control agents and fungicides.
 - Designed and implemented field trials and laboratory experiments.
 - Performed statistical data analysis using R and SPSS.
 - Presented research findings to academic supervisors and stakeholders.
 - Contributed to scientific discussions on sustainable plant disease management.
-

Publications

Book Chapter: Co-authored “Plant Virus Transmission” in *Plant Virology Theoretical Concepts*, 2024 (Published under the supervision of Dr. Meenakshi Rana).

Workshops & Certifications

- BIG DATA ANALYTICS for Agriculture Research – 2024
 - Intellectual Property Rights Workshop – 2024
 - United Nations Sustainable Development Cooperation Framework
 - Climate Change, Peace and Security: Understanding Climate-Related Security Risks Through an Integrated Lens
 - Foundational Primer on the 2030 Agenda for Sustainable Development
 - Synergizing Disaster Risk Reduction and Climate Change Adaptation Thought Leadership Course
-

Skills

- Seed Inspection & Certification Systems
 - Integrated Pest Management (IPM)
 - Plant Disease Diagnosis & Control
 - Bio-control Agents & Fungicide Application
 - Agricultural Research & Field Trials
 - Data Analysis (R, SPSS)
 - Scientific Writing & Technical Reporting
 - Climate-Smart Agriculture
-

Languages

- English (Fluent)
- Somali (Native)
